OFFICE MEMO

Date: April 8, 1969 FROM TO DATE
To: V. Wayne McCoy SLJ VWM
From: S. L. Jones
Regarding: Pollution in Nolensville Road Davidson County

I believe I told you that Miss Croft (there has been a letter to her) telephoned concerning the waste from the L & N Railroad which flows underground into the spring on her property. Although there has been some reduction in the amount of oil, the water still contains oil and is not suitable for use by cattle.

She also told me that there is a paint factory located on Ally Drive that discharges waste material into this same creek. There is also a garage located on Railroad property across the street from the paint factory that discharges oil into the stream.

This does not give a very good description, but it is the best that I could write down based on her telephone call.

S. L. J.
